BI Solutions Considering Every Organization:

We are focused on helping organizations across all industries overcome analytic limitations to put data to work across the organization so everyone can make smarter decisions based on trusted information. We deliver wide range of solutions and services considering every organization, using various reporting applications you know and love. From Business service management and finance to marketing, sales, and more. We help you to track global, regional, and local consumption patterns to better understand current trends. This, in turn, allows you to develop and deliver products and services that anticipate market needs.

Business Benefits:

- Determine the ROI of your marketing strategy.
- Receive targeted knowledge for effective decision making from a sea of data.
- Understand what drives revenue for your business.
- Personalize your sales strategy and anticipate objections.
- Avoid bottlenecks in a fragile market.
- Create a more effective business model.
- Get a single, consolidated view of your customers.

Key Features:

- Powerful analytics & Reporting capabilities
- Expert BI Staff with various Domain Knowledge
- Valuable insight into your customer's behavior.
- Complete BI/DW Services
- Effectively Streamline Business Intelligence Operations
- Productivity Gains with identification of challenges and pain areas

Our Unique Offering on ServiceNow Reporting with Performance Analytics and External Reporting solutions:

Performance Analytics:

We serve our client to grow their business with ServiceNow Performance Analytics solution which help you to track, aggregate, and visualize key performance indicators over time, rather than reporting on a point in time.

ServiceNow External Reporting Solution Approach:

DxSherpa provides a Pre-Built Solutions around core ServiceNow Processes with reliable and latest enterprise and self-service BI tools like Tableau, Qlikview, Qlik Sense, Power BI and SAP BO. We help you to overcome the limitations of complex reporting, low data quality, system overload with more visibility to your IT service provisioning, team performance and resource consumption as well as help to optimize IT services overall.
